From: Lora Conger, CFO

Subject: TacMed EMITT Active Shooter Training Manikin System Purchase

---

EMSA is requesting to purchase two (2) TacMed EMITT Active Shooter Training Manikin Systems, one for each division, at a cost of $75,762.68 per system, for a total purchase amount of $151,525.36. This purchase will support clinical training and education initiatives. These EMITT systems provide a realistic and interactive training experience engineered to recreate wound patterns associated with active shooter and deliberate mass-violence incidents. These manikin systems will supplement the high-fidelity simulators currently utilized in EMSA's Simulation Training and Education Program (SimTEP).

While lower-cost static trauma trainers may replicate wounds, they generally lack integrated performance feedback and data collection capabilities required in EMSA's simulation training program. Other high-fidelity manikins capable of similar data collection are substantially more expensive and include other features not necessary for EMSA's SimTEP program. The TacMed EMITT system uniquely fills this capability gap by providing measurable performance outcomes in a mission-specific platform without the cost burden of a comprehensive high-fidelity manikin, and it fully meets SimTEP's operational and educational requirements.

This purchase is included in the FY2027 Capital Budget.

EMSA Purchasing Policy A3 requires that all purchases exceeding $100,000 must be approved by the EMSA Board of Trustees.
